INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XXV

TRANSACTIONS OF AMERICAN SOCIETY FOR METALS

January, 1937—December, 1937

A

Acid in Electrolytic Etching of Iron and Steel; Use of Chromic—*M. Baeyertz* 1185
Alloy Steel; Study of Iron Oxide and Gas Content of Molten—*Weston A. Hare and Gilbert Soler* 1177
Alloy Steels in the Single-Blow Drop Test; Behavior of Some Low—*O. W. Ellis* 826
Alloys for Engine Bearings; Cadmium-Silver-Copper—*C. F. Smart* 571
Alloys; Structural Hardening Characteristics of Some Iron-Cobalt-Tungsten—*Wesley P. Sykes* 953
Alloys: Their Properties and Characteristics; Austenitic Stainless—*V. N. Krivobok, R. A. Lincoln and R. Patterson, Jr.* 637
Alloys; X-Ray Study of Preferred Orientation in Pure Cold-Rolled Iron-Nickel—*D. McLachlan, Jr., and Wheeler P. Davey* 1084
Aluminum Addition on the Structure of a Quenched Carbon Steel; Study of the Effect of the—*H. W. McQuaid* 490
Aluminum on the Normality of Steel; Influence of—*G. R. Brophy and E. R. Parker* 315
Application of X-Ray Diffraction to the Study of Fatigue in Metals—*Charles S. Barrett* 1115
Austenite; Case Hardening by Direct Transformation of—*Bernard R. Queneau and Ralph L. Dowdell* 904
Austenitic Stainless Alloys: Their Properties and Characteristics—*V. N. Krivobok, R. A. Lincoln and R. Patterson, Jr.* 637
Auto-Frettage; Cold Working of Hollow Cylinders by—*Norman E. Woldman* 206
Axle Shafts; Physical Properties of—*H. B. Knowlton* 260
Axles, Press-Fits, Surface Rolling, and Effect of Size; Investigation of Fatigue Strength of—*T. V. Buckwalter and O. J. Horger* 229

B

Bars; Cold Forming Processes—Drawing Rods and—*J. E. Beck* 98
Basic Open-Hearth Slag Control—*Earnshaw Cook* 325
Basic Open-Hearth Slag Samples; Magnetic Properties of a Series of—*B. A. Rogers and K. O. Stamm* 420
Bath for Hardening High Speed Steel; Electrode Salt—*Axel Hultgren* 1166
Bearings; Cadmium-Silver-Copper Alloys for Engine—*C. F. Smart*..... 571
Behavior of Some Low Alloy Steels in the Single-Blow Drop Test—*O. W. Ellis* 826
Bolts, Rivets and Nails; Cold Heading—*Roy H. Smith* 84
Boundary Attack in the Etching of Steel Specimens; Importance of—*B. L. McCarthy* 1058

C

Cadmium-Silver-Copper Alloys for Engine Bearings—*C. F. Smart* 571
Campbell Lecture—1937—*Wesley P. Sykes* 953
Carbon Steel; Study of the Effect of the Aluminum Addition on the Structure of a Quenched—*H. W. McQuaid* 490
Carbon Steels at Elevated Temperatures; Fracture of—*A. E. White, C. L. Clark and R. L. Wilson* 863

Carburizing; Notes on Continuous Gas—*R. J. Cowan* 843
Case Hardening by Direct Transformation of Austenite—*Bernard R. Queneau and Ralph L. Dowdell* 904
Cast Ferrous and Nonferrous Metals; Effect of Titanium on Some—*J. A. Duma* 788
Characteristics of Some Iron-Cobalt-Tungsten Alloys; Structural Hardening—*Wesley P. Sykes* 953
Chromic Acid in Electrolytic Etching of Iron and Steel; Use of—*M. Baeyertz* 1185
Chromium Steel Ingots; Effect of Titanium on the Hardness and Microstructure of Heat Treated 18 Per Cent—*R. E. Bannon* 737
Chromium Tool Steel; Further Study of a High Carbon-High—*W. H. Wills* 1013
Cleavage in Iron and Silicon Ferrite; Slip, Twinning and—*C. S. Barrett, G. Ansel and R. F. Mehl* 702
Cobalt-Iron-Tungsten Alloys; Structural Hardening Characteristics of Some—*Wesley P. Sykes* 953
Cold Drawing Seamless Steel Tubes—*Horace C. Knerr* 114
Cold Forming Processes—Drawing Rods and Bars—*J. E. Beck* 98
Cold Heading—Bolts, Rivets and Nails—*Roy H. Smith* 84
Cold Rolled Iron-Nickel Alloys; X-Ray Study of Preferred Orientation in Pure—*D. McLachlan, Jr., and Wheeler P. Davey* 1084
Cold Rolling of Mild Steel Sheets and Strips—*Anson Hayes and R. S. Burns* 129
Cold-Worked Nickel at Elevated Temperatures; Recovery of—*Erich Fetz* 1030
Cold Working of Hollow Cylinders by Auto-Frettage—*Norman E. Woldman* 206
Copper-Cadmium-Silver Alloys for Engine Bearings—*C. F. Smart*..... 571
Continuous Gas Carburizing; Notes on—*R. J. Cowan* 843
Control of Quality Steel Making; New Tool for the—*G. T. Motok*..... 466
Control; Basic Open-Hearth Slag—*Earnshaw Cook* 325
Conversion of Tensile Test Data from One Form of Test Piece to Another —*E. J. Janitzky* 1149
Cylinders by Auto-Frettage; Cold Working of Hollow—*Norman E. Woldman* 206

D

Deformation of Sheet and Strip Steel and Their Relation to the Deep Drawing Properties; Some Factors Affecting the Plastic—*Joseph Winlock and Ralph W. E. Leiter* 163
Deep Drawing Properties; Some Factors Affecting the Plastic Deformation of Sheet and Strip Steel and Their Relation to the—*Joseph Winlock and Ralph W. E. Leiter* 163
Desulphurization; Equilibrium in the Reaction of Hydrogen with Iron Sulphide in Liquid Iron and the Thermodynamics of—*John Chipman and Ta Li* 435
Diamond Indenters Used in the Vickers Hardness Testing Machine; Effects of Variation in—*F. B. Fuller* 1198
Differential Hardening by Induction—*M. A. Tran and W. E. Benninghoff* 935
Diffraction to the Study of Fatigue in Metals; Application of X-Ray—*Charles S. Barrett* 1115
Diffraction Studies of Distortion in Metals; X-Ray—*George L. Clark and Merton M. Beckwith* 1207
Diffusion of Hydrogen Through Nickel and Iron—*W. R. Ham* 536
Direct Transformation of Austenite; Case Hardening by—*Bernard R. Queneau and Ralph L. Dowdell* 904
Distortion in Metals; X-Ray Diffraction Studies of—*George L. Clark and Merton M. Beckwith* 1207
Drawing Properties; Some Factors Affecting the Plastic Deformation of Sheet and Strip Steel and Their Relation to the Deep—*Joseph Winlock and Ralph W. E. Leiter* 163
Drawing Rods and Bars; Cold Forming Processes—*J. E. Beck* 98
Drawing Seamless Steel Tubes; Cold—*Horace C. Knerr* 114

Drop and Hammer Forgings; Factors Relating to the Production of—*Adam M. Steever* 1
Drop Test; Behavior of Some Low Alloy Steels in the Single-Blow—*O. W. Ellis* 826

E

Effect of Certain Metallic Elements on Graphitization; Retarding—*H. A. Schwartz, H. H. Johnson and C. H. Junge* 609
Effect of Overload on the Fatigue Properties of Several Steels at Various Low Temperatures—*H. B. Wishart and S. W. Lyon* 690
Effect of Size; Investigation of Fatigue Strength of Axles, Press-Fits, Surface Rolling, and—*T. V. Buckwalter and O. J. Horger* 229
Effect of the Aluminum Addition on the Structure of a Quenched Carbon Steel; Study of the—*H. W. McQuaid* 490
Effect of Titanium on Some Cast Ferrous and Nonferrous Metals—*J. A. Duma* 788
Effect of Titanium on the Hardness and Microstructure of Heat Treated 18 Per Cent Chromium Steel Ingots—*R. E. Bannon* 737
Effects of Small Additions of Vanadium to Eutectoid Steel; Some—*J. G. Zimmerman, R. H. Aborn and E. C. Bain* 755
Effects of Variation in Diamond Indenters Used in the Vickers Hardness Testing Machine—*F. B. Fuller* 1198
Election of Officers for 1938 1244
Electrode Salt Bath for Hardening High Speed Steel—*Axel Hultgren* 1166
Electrolytic Etching of Iron and Steel; Use of Chromic Acid in—*M. Baeyertz* 1185
Elements on Graphitization; Retarding Effect of Certain Metallic—*H. A. Schwartz, H. H. Johnson and C. H. Junge* 609
Elevated Temperatures; Fracture of Carbon Steel at—*A. E. White, C. L. Clark and R. L. Wilson* 863
Elevated Temperatures; Recovery of Cold-Worked Nickel at—*Erich Fetz* 1030
Endurance of Gear Steels at 250 Degrees Fahrenheit—*A. L. Boegehold* 245
Engine Bearings; Cadmium-Silver-Copper Alloys for—*C. F. Smart* 571
Equilibrium in the Reaction of Hydrogen with Iron Sulphide in Liquid Iron and the Thermodynamics of Desulphurization—*John Chipman and Ta Li* 435
Etching of Iron and Steel; Use of Chromic Acid in Electrolytic—*M. Baeyertz* 1185
Etching of Steel Specimens; Importance of Boundary Attack in the—*B. L. McCarthy* 1058
Eutectoid Steel; Some Effects of Small Additions of Vanadium to—*J. G. Zimmerman, R. H. Aborn and E. C. Bain* 755
Extrusion of Metals—*D. K. Crampton* 55

F

Factors Affecting the Plastic Deformation of Sheet and Strip Steel and Their Relation to the Deep Drawing Properties—*Joseph Winlock and Ralph W. E. Leiter* 163
Factors Relating to the Production of Drop and Hammer Forgings—*Adam M. Steever* 1
Fatigue in Metals; Application of X-Ray Diffraction to the Study of—*Charles S. Barrett* 1115
Fatigue Properties of Several Steels at Various Low Temperatures; Effect of Overload on the—*H. B. Wishart and S. W. Lyon* 690
Fatigue Strength of Axles, Press-Fits, Surface Rolling, and Effect of Size; Investigation of—*T. V. Buckwalter and O. J. Horger* 229
Ferrite; Slip, Twinning and Cleavage in Iron and Silicon—*C. S. Barrett, G. Ansel and R. F. Mehl* 702
Ferrous and Nonferrous Metals; Effect of Titanium on Some Cast—*J. A. Duma* 788
Flakes in Steel by Heating in Hydrogen; Production of—*R. E. Cramer* 923
Forging; Hot Press and Upset—*J. H. Friedman* 28

Forgings; Factors Relating to the Production of Drop and Hammer—*Adam M. Steever* 1
Forming Processes—Drawing Rods and Bars; Cold—*J. E. Beck* 98
Fracture of Carbon Steels at Elevated Temperatures—*A. E. White, C. L. Clark and R. L. Wilson* 863
Further Study of a High Carbon-High Chromium Tool Steel—*W. H. Wills* 1013

G

Gas Carburizing; Notes on Continuous—*R. J. Cowan* 843
Gas Content of Molten Alloy Steel; Study of Iron Oxide and—*Weston A. Hare and Gilbert Soler* 1177
Gas Content of Molten Steel; Improved Method for Determining—*Weston Hare, Leland Peterson and Gilbert Soler* 889
Gear Steels at 250 Degrees Fahrenheit; Endurance of—*A. L. Boegehold* 245
Grain Size; Study of—*C. H. Herty, Jr., D. L. McBride and E. H. Hollenback* 297
Graphitization; Retarding Effect of Certain Metallic Elements on—*H. A. Schwartz, H. H. Johnson and C. H. Junge* 609

H

Hammer Forgings; Factors Relating to the Production of Drop and—*Adam M. Steever* 1
Hardening by Direct Transformation of Austenite; Case—*Bernard R. Queneau and Ralph L. Dowdell* 904
Hardening by Induction; Differential—*M. A. Tran and W. E. Benninghoff* 935
Hardening Characteristics of Some Iron-Cobalt-Tungsten Alloys; Structural—*Wesley P. Sykes* 953
Hardening High Speed Steel; Electrode Salt Bath for—*Axel Hultgren* 1166
Hardness and Microstructure of Heat Treated 18 Per Cent Chromium Steel Ingots; Effect of Titanium on the—*R. E. Bannon* 737
Hardness Testing Machine; Effects of Variation in Diamond Indenters Used in the Vickers—*F. B. Fuller* 1198
Heat Treated 18 Per Cent Chromium Steel Ingots; Effect of Titanium on the Hardness and Microstructure of—*R. E. Bannon* 737
Heating in Hydrogen; Production of Flakes in Steel by—*R. E. Cramer* 923
High Carbon-High Chromium Tool Steel; Further Study of a—*W. H. Wills* 1013
High Chromium Tool Steel; Further Study of a High Carbon—*W. H. Wills* 1013
High Speed Steel; Electrode Salt Bath for Hardening—*Axel Hultgren* 1166
Hollow Cylinders by Auto-Frettage; Cold Working of—*Norman E. Woldman* 206
Hot Press and Upset Forging—*J. H. Friedman* 28
Hydrogen; Production of Flakes in Steel by Heating in—*R. E. Cramer* 923
Hydrogen Diffusion Through Nickel and Iron—*W. R. Ham* 536
Hydrogen with Iron Sulphide in Liquid Iron and the Thermodynamics of Desulphurization; Equilibrium in the Reaction of—*John Chipman and Ta Li* 435

I

Importance of Boundary Attack in the Etching of Steel Specimens—*B. L. McCarthy* 1058
Improved Method for Determining Gas Content of Molten Steel—*Weston Hare, Leland Peterson and Gilbert Soler* 889
Indenters Used in the Vickers Hardness Testing Machine; Effects of Variation in Diamond—*F. B. Fuller* 1198
Induction; Differential Hardening by—*M. A. Tran and W. E. Benninghoff* 935
Influence of Aluminum on the Normality of Steel—*G. R. Brophy and E. R. Parker* 315
Ingots; Effect of Titanium on the Hardness and Microstructure of Heat Treated 18 Per Cent Chromium Steel—*R. E. Bannon* 737

Investigation of Fatigue Strength of Axles, Press-Fits, Surface Rolling, and Effect of Size—*T. V. Buckwalter and O. J. Horger* 229
Iron; The Diffusion of Hydrogen Through Nickel and—*W. R. Ham* 536
Iron and Silicon Ferrite; Slip, Twinning and Cleavage in—*C. S. Barrett, G. Ansel and R. F. Mehl* 702
Iron and Steel; Use of Chromic Acid in Electrolytic Etching of—*M. Baeyertz* 1185
Iron and the Thermodynamics of Desulphurization; Equilibrium in the Reaction of Hydrogen with Iron Sulphide in Liquid—*John Chipman and Ta Li* 435
Iron Oxide and Gas Content of Molten Alloy Steel; Study of—*Weston A. Hare and Gilbert Soler* 1177
Iron Sulphide in Liquid Iron and the Thermodynamics of Desulphurization; Equilibrium in the Reaction of Hydrogen with—*John Chipman and Ta Li* 435
Iron-Cobalt-Tungsten Alloys; Structural Hardening Characteristics of Some—*Wesley P. Sykes* 953
Iron-Nickel Alloys; X-Ray Study of Preferred Orientation in Pure Cold-Rolled—*D. McLachlan, Jr., and Wheeler P. Davey* 1084

L

Liquid Iron and the Thermodynamics of Desulphurization; Equilibrium in the Reaction of Hydrogen with Iron Sulphide in—*John Chipman and Ta Li* 435
Low Alloy Steels in the Single-Blow Drop Test; Behavior of Some—*O. W. Ellis* 826

M

Magnetic Properties of a Series of Basic Open-Hearth Slag Samples—*B. A. Rogers and K. O. Stamm* 420
Metallic Elements on Graphitization; Retarding Effect of Certain—*H. A. Schwartz, H. H. Johnson and C. H. Junge* 609
Metals; Application of X-Ray Diffraction to the Study of Fatigue in—*Charles S. Barrett* 1115
Metals; Effect of Titanium on Some Cast Ferrous and Nonferrous—*J. A. Duma* 788
Metals; Extrusion of—*D. K. Crampton* 55
Metals; X-Ray Diffraction Studies of Distortion in—*George L. Clark and Merton M. Beckwith* 1207
Method for Determining Gas Content of Molten Steel; Improved—*Weston Hare, Leland Peterson and Gilbert Soler* 889
Microstructure of Heat Treated 18 Per Cent Chromium Steel Ingots; Effect of Titanium on the Hardness and—*R. E. Bannon* 737
Molten Alloy Steel; Study of Iron Oxide and Gas Content of—*Weston A. Hare and Gilbert Soler* 1177
Molten Steel; Improved Method for Determining Gas Content of—*Weston Hare, Leland Peterson and Gilbert Soler* 889

N

Nails, Bolts, Rivets; Cold Heading—Roy H. Smith 84
New Tool for the Control of Quality Steel Making—*G. T. Motok* 466
Nickel Alloys; X-Ray Study of Preferred Orientation in Pure Cold-Rolled Iron—*D. McLachlan, Jr., and Wheeler P. Davey* 1084
Nickel and Iron; The Diffusion of Hydrogen Through—*W. R. Ham* 536
Nickel at Elevated Temperatures; Recovery of Cold-Worked—*Erich Fetz* 1030
Nonferrous Metals; Effect of Titanium on Some Cast Ferrous and—*J. A. Duma* 788
Normality of Steel; Influence of Aluminum on the—*G. R. Brophy and E. R. Parker* 315
Notes on Continuous Gas Carburizing—*R. J. Cowan* 843

O

Open-Hearth Slag Control; Basic—*Earnshaw Cook* 325
Open-Hearth Slag Samples; Magnetic Properties of a Series of Basic—*B. A. Rogers and K. O. Stamm* 420
Orientation in Pure Cold-Rolled Iron-Nickel Alloys; X-Ray Study of Preferred—*D. McLachlan, Jr., and Wheeler P. Davey* 1084
Overload on the Fatigue Properties of Several Steels at Various Low Temperatures; Effect of—*H. B. Wishart and S. W. Lyon* 690
Oxide and Gas Content of Molten Alloy Steel; Study of Iron—*Weston A. Hare and Gilbert Soler* 1177

P

Physical Properties of Axle Shafts—*H. B. Knowlton* 260
Plastic Deformation of Sheet and Strip Steel and Their Relation to the Deep Drawing Properties; Some Factors Affecting the—*Joseph Winlock and Ralph W. E. Leiter* 163
Preferred Orientation in Pure Cold-Rolled Iron-Nickel Alloys; X-Ray Study of—*D. McLachlan, Jr., and Wheeler P. Davey* 1084
President's Report, 1937 1228
Press and Upset Forging; Hot—*J. H. Friedman* 28
Press-Fits, Surface Rolling, and Effect of Size; Investigation of Fatigue Strength of Axles—*T. V. Buckwalter and O. J. Horger* 229
Production of Drop and Hammer Forgings; Factors Relating to the—*Adam M. Steever* 1
Production of Flakes in Steel by Heating in Hydrogen—*R. E. Cramer* 923
Properties; Some Factors Affecting the Plastic Deformation of Sheet and Strip Steel and Their Relation to the Deep Drawing—*Joseph Winlock and Ralph W. E. Leiter* 163
Properties and Characteristics; Austenitic Stainless Alloys—*V. N. Krivobok, R. A. Lincoln and R. Patterson, Jr.* 637
Properties of a Series of Basic Open-Hearth Slag Samples; Magnetic—*B. A. Rogers and K. O. Stamm* 420
Properties of Axle Shafts; Physical—*H. B. Knowlton* 260
Properties of Several Steels at Various Low Temperatures; Effect of Overload on the Fatigue—*H. B. Wishart and S. W. Lyon* 690
Pure Cold-Rolled Iron-Nickel Alloys; X-Ray Study of Preferred Orientation in—*D. McLachlan, Jr., and Wheeler P. Davey* 1084

Q

Quality Steel Making; New Tool for the Control of—*G. T. Motok*..... 466
Quenched Carbon Steel; Study of the Effect of the Aluminum Addition on the Structure of a—*H. W. McQuaid* 490

R

Reaction of Hydrogen with Iron Sulphide in Liquid Iron and the Thermodynamics of Desulphurization; Equilibrium in the—*John Chipman and Ta Li* 435
Recovery of Cold-Worked Nickel at Elevated Temperatures—*Erich Fetz* 1030
Retarding Effect of Certain Metallic Elements on Graphitization—*H. A. Schwartz, H. H. Johnson and C. H. Junge* 609
Rivets, Bolts and Nails; Cold Heading—*Roy H. Smith* 84
Rolled Iron-Nickel Alloys; X-Ray Study of Preferred Orientation in Pure Cold—*D. McLachlan, Jr., and Wheeler P. Davey*..... 1084
Rolling, and Effect of Size; Investigation of Fatigue Strength of Axles, Press-Fits, Surface—*T. V. Buckwalter and O. J. Horger* 229
Rolling of Mild Steel Sheets and Strips; Cold—*Anson Hayes and R. S. Burns* 129
Rods and Bars; Cold Forming Processes—Drawing—*J. E. Beck* 98

S

Salt Bath for Hardening High Speed Steel; Electrode—*Axel Hultgren* 1166
Seamless Steel Tubes; Cold Drawing—*Horace C. Knerr* 114
Secretary's Report, 1937 1235
Shafts; Physical Properties of Axle—*H. B. Knowlton* 260
Sheet and Strip Steel and Their Relation to the Deep Drawing Properties; Some Factors Affecting the Plastic Deformation of—*Joseph Winlock and Ralph W. E. Leiter* 163
Sheets and Strips; Cold Rolling of Mild Steel—*Anson Hayes and R. S. Burns* 129
Silicon Ferrite; Slip, Twinning and Cleavage in Iron and—*C. S. Barrett, G. Ansel and R. F. Mehl* 702
Silver-Cadmium-Copper Alloys for Engine Bearings—*C. F. Smart* 571
Single-Blow Drop Test; Behavior of Some Low Alloy Steels in the—*O. W. Ellis* 826
Size; Investigation of Fatigue Strength of Axles, Press-Fits, Surface Rolling, and Effect of—*T. V. Buckwalter and O. J. Horger* 229
Slag Control; Basic Open-Hearth—*Earnshaw Cook* 325
Slag Samples; Magnetic Properties of a Series of Basic Open-Hearth—*B. A. Rogers and K. O. Stamm* 420
Slip, Twinning and Cleavage in Iron and Silicon Ferrite—*C. S. Barrett, G. Ansel and R. F. Mehl* 702
Some Effects of Small Additions of Vanadium to Eutectoid Steel—*J. G. Zimmerman, R. H. Aborn and E. C. Bain* 755
Some Factors Affecting the Plastic Deformation of Sheet and Strip Steel and Their Relation to the Deep Drawing Properties—*Joseph Winlock and Ralph W. E. Leiter* 163
Specimens; Importance of Boundary Attack in the Etching of Steel—*B. L. McCarthy* 1058
Stainless Alloys: Their Properties and Characteristics; Austenitic—*V. N. Krivobok, R. A. Lincoln and R. Patterson, Jr.* 637
Steel: Basic Open-Hearth Slag Control—*Earnshaw Cook* 325
Steel by Heating in Hydrogen; Production of Flakes in—*R. E. Cramer* 923
Steel; Electrode Salt Bath for Hardening High Speed—*Axel Hultgren* 1166
Steel; Further Study of a High Carbon-High Chromium Tool—*W. H. Wills* 1013
Steel; Improved Method for Determining Gas Content of Molten—*Weston Hare, Leland Peterson and Gilbert Soler* 889
Steel; Influence of Aluminum on the Normality of—*G. R. Brophy and E. R. Parker* 315
Steel Ingots; Effect of Titanium on the Hardness and Microstructure of Heat Treated 18 Per Cent Chromium—*R. E. Bannon* 737
Steel Making; New Tool for the Control of Quality—*G. T. Motok* 466
Steels at 250 Degrees Fahrenheit; Endurance of Gear—*A. L. Boegehold* 245
Steels at Elevated Temperatures; Fracture of Carbon—*A. E. White, C. L. Clark and R. L. Wilson* 863
Steels at Various Low Temperatures; Effect of Overload on the Fatigue Properties of Several—*H. B. Wishart and S. W. Lyon* 690
Steel Sheets and Strips; Cold Rolling of Mild—*Anson Hayes and R. S. Burns* 129
Steel; Some Effects of Small Additions of Vanadium to Eutectoid—*J. G. Zimmerman, R. H. Aborn and E. C. Bain* 755
Steel Specimens; Importance of Boundary Attack in the Etching of—*B. L. McCarthy* 1058
Steel; Study of Iron Oxide and Gas Content of Molten Alloy—*Weston A. Hare and Gilbert Soler* 1177
Steel; Study of the Effect of the Aluminum Addition on the Structure of a Quenched Carbon—*H. W. McQuaid* 490
Steel Tubes; Cold Drawing Seamless—*Horace C. Knerr* 114
Steel; Use of Chromic Acid in Electrolytic Etching of Iron and—*M. Baeyertz* 1185
Strength of Axles, Press-Fits, Surface Rolling, and Effect of Size; Investigation of Fatigue—*T. V. Buckwalter and O. J. Horger* 229

Strip Steel and Their Relation to the Deep Drawing Properties; Some Factors Affecting the Plastic Deformation of Sheet and—*Joseph Winlock and Ralph W. E. Leiter* 163
Strips; Cold Rolling of Mild Steel Sheets and—*Anson Hayes and R. S. Burns* 129
Structural Hardening Characteristics of Some Iron-Cobalt-Tungsten Alloys—*Wesley P. Sykes* 953
Structure of a Quenched Carbon Steel; Study of the Effect of the Aluminum Addition on the—*H. W. McQuaid* 490
Studies of Distortion in Metals; X-Ray Diffraction—*George L. Clark and Merton M. Beckwith* 1207
Study of a High Carbon-High Chromium Tool Steel—*W. H. Wills* 1013
Study of Fatigue in Metals; Application of X-Ray Diffraction to the—*Charles S. Barrett* 1115
Study of Grain Size—*C. H. Herty, Jr., D. L. McBride and E. H. Hollenback* 297
Study of Iron Oxide and Gas Content of Molten Alloy Steel—*Weston A. Hare and Gilbert Soler* 1177
Study of Preferred Orientation in Pure Cold-Rolled Iron-Nickel Alloys; X-Ray—*D. McLachlan, Jr., and Wheeler P. Davey* 1084
Study of the Effect of the Aluminum Addition on the Structure of a Quenched Carbon Steel—*H. W. McQuaid* 490
Surface Rolling, and Effect of Size; Investigation of Fatigue Strength of Axles, Press-Fits—*T. V. Buckwalter and O. J. Horger* 229

T

Technical Program and Report of Officers—Nineteenth Annual Convention of the Society 1225
Temperatures; Effect of Overload on the Fatigue Properties of Several Steels at Various Low—*H. B. Wishart and S. W. Lyon* 690
Temperatures; Fracture of Carbon Steels at Elevated—*A. E. White, C. L. Clark and R. L. Wilson* 863
Temperatures; Recovery of Cold-Worked Nickel at Elevated—*Erich Fetz* 1030
Tensile Test Data from One Form of Test Piece to Another; Conversion of—*E. J. Janitzky* 1149
Test; Behavior of Some Low Alloy Steels in the Single-Blow Drop—*O. W. Ellis* 826
Test Data from One Form of Test Piece to Another; Conversion of Tensile—*E. J. Janitzky* 1149
Testing Machine; Effects of Variation in Diamond Indenters Used in the Vickers Hardness—*F. B. Fuller* 1198
Thermodynamics of Desulphurization; Equilibrium in the Reaction of Hydrogen with Iron Sulphide in Liquid Iron and the—*John Chipman and Ta Li* 435
Titanium on Some Cast Ferrous and Nonferrous Metals; Effect of—*J. A. Duma* 788
Titanium on the Hardness and Microstructure of Heat Treated 18 Per Cent Chromium Steel Ingots; Effect of—*R. E. Bannon* 737
Tool for the Control of Quality Steel Making; New—*G. T. Motok* 466
Tool Steel; Further Study of a High Carbon-High Chromium—*W. H. Wills* 1013
Transformation of Austenite; Case Hardening by Direct—*Bernard R. Queneau and Ralph L. Dowdell* 904
Treasurer's Report, 1937 1231
Tubes; Cold Drawing Seamless Steel—*Horace C. Knerr* 114
Tungsten-Iron-Cobalt Alloys; Structural Hardening Characteristics of Some—*Wesley P. Sykes* 953
Twinning and Cleavage in Iron and Silicon Ferrite; Slip—*C. S. Barrett, G. Ansel and R. F. Mehl* 702

U

Upset Forging; Hot Press and—*J. H. Friedman* 28
Use of Chromic Acid in Electrolytic Etching of Iron and Steel—*M. Baeyertz* 1185

V

Vanadium to Eutectoid Steel; Some Effects of Small Additions of—*J. G. Zimmerman, R. H. Aborn and E. C. Bain* 755
Variation in Diamond Indenters Used in the Vickers Hardness Testing Machine; Effects of—*F. B. Fuller* 1198
Vickers Hardness Testing Machine; Effects of Variation in Diamond Indenters Used in the—*F. B. Fuller* 1198

W

Which Grain Size?—*C. H. Herty, Jr., D. L. McBride and E. H. Hollenback* 297
Working of Hollow Cylinders by Auto-Frettage; Cold—*Norman E. Woldman* 206

X

X-Ray Diffraction Studies of Distortion in Metals—*George L. Clark and Merton M. Beckwith* 1207
X-Ray Diffracton to the Study of Fatigue in Metals; Application of—*Charles S. Barrett* 1115
X-Ray Study of Preferred Orientations in Pure Cold-Rolled Iron-Nickel Alloys—*D. McLachlan, Jr., and Wheeler P. Davey* 1084
